Skills

Languages

Proficient: Python, R

Experienced: SQL, Excel

Tech Stack

Jupyter Notebook (Anaconda), Pycharm, Rstudio

Experience

Bureau of Meteorology

Jul 2025 – Oct 2025

Docklands, Melbourne

- Developed a Convolutional Neural Network machine learning model for estimating global wind patterns every hour across the globe. The technical tools used include Numpy, Pandas, Sci-kit Learn, and Tensorflow. **The model's accuracy was on average 85 percent across all regions.** This model could **increase forecasting efficiency by 20x** compared to traditional approaches. Findings will be published soon in an academic journal.
- Managed over 500 Gigabytes of data to train the model.
- Worked in a hybrid environment with a team who were in the office only 2 days a week.
- Presented my findings to non-technical stakeholders receiving a high distinction average due to its clarity.

Asahi (Carlton United Breweries)

Jul 2024 – Oct 2024

Abbotsford, Melbourne

- Worked in a cross-functional team with Engineers, Mechanical Operators, and Quality Maintenance professionals.
- Used Excel VBA to develop prototypes of various charts that can forecast future issues with can seamer quality in real time. These charts can also infer whether the future issue is due to the company itself or external providers.
- Various statistical modeling techniques were used such as tests for normality, as well as t-tests and ANOVA tests. These tests validated the effectiveness of the charts.
- These charts **were able to diagnose problems weeks before they were found manually by the company.** If these charts were used earlier by the company, **5 million dollars would have been saved** in 2023 alone.

Education

Monash University

*Applied Data Science (Honours): **Grade Point Average: 3.281 (Distinction)***

Feb 2022 – Nov 2025

Clayton, Melbourne

Hobbies

- Write Data Science related articles on Medium.
- Keen chess player. Played in competitions at school, and I still play frequently online.
- Play viola: Joined an orchestra at University.

Volunteering

Interchange Outer East

Mar 2025 – Present

Ferntree Gully, Melbourne

- Looking after disabled people and socializing with them while going on fun activities.
